PRESS RELEASE

CME Shines Bright With New Work Light Product Launch: SiteLites

CME has launched SiteLites™ product line of new, professional grade LED Work Lights that are used as portable/temporary job site lighting in applications from construction, maintenance, emergency services, agriculture, forensics, and homeowners. CME has released these new products for sale on Amazon. SiteLites tripod, floorstand, and small magnetic base models are rugged work light products with new LED technology to support all your industrial, home or work lightning needs!

Pinellas Park, FL, October 3, 2018: CME is launching a new work-light product line, named SiteLites, for all your lighting needs. Our customers can choose from four SiteLites™ models:

- Quad LED Work Light: a tripod system providing 12,000 Lumens (Flood, Spot, or Combo light settings).
- Single LED Head Work Light: a very bright 9000 Lumen, tripod unit (providing Flood/Spot Combo luminaire)
- Floor Work Light: a powerful 6000 Lumen, 360° adjustable floor stand light (Flood or Spot Light Settings)
- Magnetic Work Light "MagLite": a portable, light-weight, rechargeable LED Light/Lantern with a magnetic base and handle.

These SiteLites options provide customers with excellent portable/temporary LED work light units for end users: From industry to homeowners, and others such as emergency services and first responders, construction trades, maintenance and repair services, restoration services, and other users in manufacturing facilities, mining, oil & gas, refineries, agriculture, and other industries. Ready for tough weather use, the tripod and floorstand fixtures are a powder-coated, cast aluminum alloy body for long wear and includes an integral multi-fin heat sink to keep each fixture cool to the touch.

CME has been developing and designing electrical power distribution and LED illuminated control panel products for over two decades for rugged military and industrial applications. Dr. Nancy Crews, CME's President stated that:

"CME continues to work to develop and produce innovative products like SiteLites to help people perform their work more efficiently. Our SiteLites product line is our special outdoor/indoor job site lighting that addresses missing features and capabilities that commonly available work lighting products have today."

About CME: Located in Pinellas Park, Florida, CME employs a diverse group of engineering and manufacturing personnel. The company provides design, development, and manufacture of Electrical products. CME has won local and national technology awards and is a developer of innovative products for government, commercial and industrial applications. For more information about SiteLites, see <http://www.custom-mfg-eng.com/sitelites.html>, or contact sales@custom-mfg-eng.com or 727-547-9799 Ext. 1202.
